

NORTHSTAR SCI GLOBAL FLEXIBLE FEEDER FUND**NORTHSTAR**

MDD Issue Date: 2020/10/21

FUND OBJECTIVE

The objective of the portfolio is to deliver long-term capital growth by investing in various assets classes, predominantly in equity.

FUND STRATEGY

The portfolio will apart from assets in liquid form invest in participatory interests of the Northstar Global Flexible Fund established under Sanlam Global Funds PLC. The Northstar Global Flexible Fund invests in global equities which will primarily be common stocks and other securities with equity characteristics, comprising preference shares, as well as depository receipts, global bonds (fixed and/or floating; government and/or corporate; rated and unrated), real estate investment trusts (REITS) and cash and cash equivalents. The fund will be managed with a bias towards global equities due to the superior long-term returns from this asset class. If prospective returns from equities are unattractive, exposure to other asset classes, such as real estate, bonds and cash will increase. The fund is not focused on any specific geographical area, industry or sector and may invest in equities of companies across the full spectrum of market capitalisations. The portfolio may also invest in financial instruments for the exclusive purpose of hedging against exchange rate risk.

ANNUALISED PERFORMANCE (%)

*Strategy: Northstar Asset Management are the portfolio manager of the Northstar SCI Global Flexible Fund ("NSSGF"); a SA CIS, which is approved by the SA regulator (FSCA), which follows an identical investment strategy to that of this Fund. The NSSGF's inception date was 12 January 2016. In order to produce the Strategy data below, the performance of the NSSGF is used between 12 January 2016 and 30 June 2017, and the Northstar Global Flexible Feeder Fund performance is used from 1 July 2017 to present. This provides investors and potential investors with a longer-term track record of the Portfolio Manager's performance; this forms the Strategy

*Past performance is not necessarily a guide to future performance

RISK PROFILE

Moderate Aggressive

Your primary aim is to achieve the required capital growth necessary to realise your long-term goals and objectives. You are prepared to tolerate fluctuations in your returns because you know that the longer-term picture is worth the short-term pain, even if that means you lose money sometimes. While diversified across all the major asset classes, your portfolio will be tilted more towards equities because you know you offer the best long-term returns of all asset classes and thus your wealth will grow over time.

GLOSSARY TERMS

Annualised total returns

Annualised return is the weighted average compound growth rate over the period measured.

Capital growth

Capital growth is the profit made on an investment, measured by the increase in its market value over the invested amount or cost price. It is also called capital appreciation.

Equities

Equities are shares that represent an institution's or individual's ownership in a listed company. These shares are also the "vehicle" through which they are able to "share" in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase which translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling.

Shares / equities are usually considered to have the potential for the highest return of all the investment classes but also have the highest level of risk i.e. share investments have the most volatile returns over the short term. An investment in equities should be viewed with a 7 to 10-year horizon.

Undervalued equity stocks (Value investing approach)

This is a strategy of selecting shares that trade for less than their intrinsic values. Value investors actively seek stocks that they believe the market has undervalued. They believe the market overreacts to good and bad news, resulting in stock price movements that do not correspond with the company's actual long-term fundamentals. The result is an opportunity for value investors to profit by buying when the price is deflated.

Securities

A general term for shares, bonds, money market instruments and debentures.

Collective investment scheme (CIS)

Collective investment schemes (also called unit trusts) are portfolios of assets such as equities, bonds, cash and listed property, in which investors can buy units. They allow private investors to pool their money together into a single fund, thus spreading their risk across a range of investments, getting the benefit of professional fund management, and reducing their costs.

Total Expense Ratio (TER)

This is the total costs associated with managing and operating an investment (administration, financial planning and servicing fees). These costs consist primarily of management fees and additional expenses such as trading fees, legal fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.

Standard deviation

Standard deviation (also called monthly volatility) is a measure of how much returns on an investment change from month to month. It is typically used by investors to gauge the amount of expected volatility in an investment.

Disclaimer

Northstar is an authorised financial services provider (licence number 601). The Northstar Global Flexible Fund launch date is 1 June 2017. Further details of the fund are available at www.sanlam.ie. PORTFOLIO MANAGER COMMENT

Portfolio Review: As at 30 September 2020

The Northstar Global Flexible Fund delivered a return of +6.03% in US dollars for the 3 months to end-September 2020, which compares with the average fund return in the Morningstar EEA USD Flexible Fund peer group of +4.04%.

Year-to-date the Fund returned +4.97%, ahead of the Morningstar peer group and MSCI World Index returns of -0.96% and +1.70% respectively, but behind the return offered by the Bloomberg Barclays Global Aggregate Bond Index of +5.72%.

Despite the strong recovery in global equity markets over the past 6 months, the Fund continues to deliver on its longer-term objective, which is to outperform global equities over a full market cycle, through lower downside participation. The Fund outperformed the MSCI World Index over the past 2 and 3 years by +1.78% p.a. and +1.08% p.a. respectively, ranking amongst the top 4% of global flexible funds tracked by Morningstar over the past three years.

Global equities enjoyed another strong quarter, led by Emerging Markets (+9.07%) and cyclical sectors, notably Consumer Discretionary (+16.07%) and Information Technology (+11.90%). Energy (-15.6%), Financials (+1.95%) and the FTSE 100 (+0.42%) were notable laggards, as the reflationary force behind a recovery in traditional Value sectors ran out of steam.

The underlying equity component of the Fund outperformed the MSCI World Index by +2.25% on a gross basis over the past quarter. Stock selection continues to be the key driver of Fund return, contributing +1.73% of the equity return.

In the three months to September, Alibaba (+36.3%), Dunkin Brands (+26.2%) and Cognizant Technology (+22.6%) were the best performing holdings in the Fund, whilst Boeing (-9.8%), Jones Lang LaSalle (-7.5%) and Blackstone (-7.2%) underperformed. Taking account of relative positioning to the benchmark, Alibaba (+0.72%), Berkshire Hathaway (+0.49%) and Dunkin Brands (+0.46%), made the largest contribution to overall returns, offset by negative attribution from Blackstone (-0.56%) as well as from Apple (-0.74%) and Tesla (-0.35%), which the Fund had no exposure to.

Fund Positioning:

We continue to actively manage the equity allocation in the Fund in accordance with its weighted intrinsic value discount, i.e. guided by a proprietary bottom up valuation process.

Having re-established equity weights from a low of less than 50% of the Fund in mid-March, we once again set about reducing exposure in mid-August from a high of 67.8%. This action was motivated by the less attractive valuation of equities following a greater than 50% rally from March lows and was specifically the case for some of the remaining Technology exposure in the Fund, which had performed very strongly. This action proved prescient as the market peaked approximately two weeks later, with Technology shares particularly hard hit.

We continue to view global bonds as unattractively valued, choosing to retain the balance of the Fund's holdings in short duration investment grade bonds as well as commercial paper and money market instruments.

PORTFOLIO MANAGER

Rory Spangenberg joined Northstar in January 2017 as an analyst, with a focus on global research and investments. Rory joined Northstar from SignalHill Investment Management, where he was the managing director and portfolio manager.

Prior to SignalHill, Rory spent 10 years with Investec managing value and income growth strategies. Experience prior to that includes: heading the South African research sales desk at Investec, London; research sales for Barnard Jacobs Mellet; and equity portfolio manager of the Sasol Pension Fund.

Regulatory statement

The Fund is a sub-fund of the Sanlam Global Funds plc, an open-ended Umbrella type Investment Company, with segregated liability between its sub-funds, authorised by the Central Bank of Ireland, as a Retail Investors Alternative Investment Fund, a category of non-UCITS collective investment scheme to which the Companies Act 2014 and Chapter 1 of the AIF Rule Book applies. The Fund is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, Tel + 353 1 205 3510, Fax + 353 1 205 3521 which is authorised by the Central Bank of Ireland, as a UCITS Management Company, and an Alternative Investment Fund Manager, and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2002.

The Sanlam Global Funds Plc full prospectus, the Fund supplement, and the MDD is available free of charge from the Manager or at www.sanlam.ie. This is neither an offer to sell, nor a solicitation to buy any securities in any fund managed by us. Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, and the relevant subscription/application forms, all of which must be read in their entirety together with the Sanlam Global Funds plc prospectus, the Fund supplement and the MDD. No offer to purchase securities will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. A schedule of fees and charges and maximum commissions is available on request from the Manager.

This is a Section 65 approved fund under the Collective Investment Schemes Control Act 45, 2002 (CISCA). Sanlam Collective Investments (RF) (Pty) Ltd is the South African Representative Office for this fund.

The information to follow does not constitute financial advice, solicitation, invitation or investment recommendation as contemplated in terms of the South African Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment, decision, not all investments are suitable for all investors. Collective investment schemes are generally medium to long term investments.

Please note that past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. The validity and accuracy of any illustrations, forecasts or hypothetical data are not guaranteed and are only provided for illustrative purposes. Changes in exchange rates may have an adverse effect on the value, price or income of the product. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending.

Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ based on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Trail commission and incentives may be paid and are for the account of the Manager. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. The Manager retains full legal responsibility for this fund. Performance figures for periods longer than 12 months are annualized.
